

FIREBOX M4800 & M5800

Up to 87 Gbps firewall throughput and 11.3 Gbps UTM throughput

TOP OF THE LINE PERFORMANCE & SECURITY

With firewall throughput of up to 87 Gbps and UTM throughput up to 11.3 Gbps, the Firebox® M4800 and M5800 are our fastest Firebox appliances ever. This level of performance, paired with powerful security, flexible high-port density, and affordability makes these the ideal solutions for distributed, hub-and-spoke type deployment scenarios.

2 x 40 Gb Fiber

“ WatchGuard’s Firebox M4800 and M5800 appliances bring serious security to the midmarket, while giving us the ability to maintain visibility across our customer’s network using the fastest, highest performing UTM solution available ”

TOTAL NETWORK PROTECTION

Every network needs a full arsenal of scanning engines to protect against spyware, viruses, malicious apps, botnets and more. Typically deployed at the corporate headquarters, Firebox M4800/M5800 appliances serve as the “hub,” responsible for managing and providing layered security for all communications between the head office and all remote employee and business sites.

A CLOUD’S-EYE VIEW OF YOUR ENTIRE NETWORK

WatchGuard Cloud provides full visibility into your network so that you can make timely, informed, and effective decisions about your network security anywhere, anytime. The platform displays 100+ dashboards and reports that allow you to quickly see high-level trends and anomalies, then drill down into detailed information on each.

EXPANSION MODULES FOR GREATER PORT DENSITY

Firebox M4800/M5800 appliances provide greater port density options that enable IT professionals to add additional network modules with more fiber or copper ports. Each appliance has two available slots for expansion modules, with options for 4 x 10 Gb fiber, 8 x 1 Gb copper, 8 x 1 Gb fiber, or 2 x 40 Gb fiber. Module options are identical to those on our mid-range Firebox devices, for even more flexibility.

AUTOMATION TO THE CORE

WatchGuard Firebox M Series appliances are designed with automation to the core, allowing your IT team to do more with less. The WatchGuard Automation Core makes it possible to deploy from the Cloud, block threats, update signatures, and detect and kill malware, all without lifting a finger.

FEATURES & BENEFITS

- Up to 87 Gbps firewall throughput. Turn on all security scanning engines and still see an amazing 11.3 Gbps throughput.
- All logging and reporting functions included with purchase, with over 100 dashboards and reports including PCI and HIPAA.
- Customize your port configuration to meet current needs, knowing you have the flexibility to adapt as the network evolves. This is how to future-proof your network and eliminate costly rip-and-replace scenarios.
- Redundant hot-swap power supplies ensure maximum availability.
- Access Portal is a clientless VPN solution that comes standard with every Firebox and provides secure remote access to remote users.

¹Throughput rates are determined using multiple flows through multiple ports and will vary depending on environment and configuration. Max firewall throughput tested via direct connection using 1518 byte UDP frame based on RFC 2544 methodology. All testing performed on Fireware version 12.5.1.

²UTM throughput is measured using HTTP traffic with AV, IPS, and Application Control enabled, and does not account for all security services available on the appliance.
